Our #212 Nitrile Opens New Doors

The 212 Series OmniTrust Nitrile Glove, sometimes called our Blurple (blue/purple) glove, is used extensively in acute and primary care. If you are selling Gloves to either the EMS or Chemotherapy Markets, our #212 Series Nitrile Glove offers a tremendous value and NEW opportunities.

Many EMS Units have been buying our #212 nitrile glove as they know of it's diversity. The emergency worker loves the 212 because it is "tough". As best described by a Mid-Atlantic Paramedic, "The 212 is durable enough to not rip against the pavement at an auto accident while working with a patient, yet sensitive enough to administer an IV".

This extremely popular glove now has an additional market - that of chemotherapy. Recent approvals have now certified the 212 as a glove to use in working with Chemotherapy Drugs. Compared with specialty "Chemotherapy Gloves", the 212 offers huge savings without sacrificing quality. Omni offers all this with certified protection.

If your company services the EMS and Chemo markets, you must see and compare this glove! For samples, e-mail us at News@Omnigloves.com. We will be advertising on several Fire/EMS web sites, such as VaFireNews.com, and look forward to passing leads along to our stocking dealers in the respective areas. Get on board with Omni today!

OMNI GLOVES in CANADA

Omni International LLC has just received its Canadian Medical Device License. Now ALL Omni Gloves have received the proper documentation to be sold throughout Canada.

Thank you to our Canadian Distributors for their assistance as we look forward to stronger growth of our business up north in 2008. Call us and let us know what we can do to help you.

TidBits

CHINA

The recent earthquakes that have devastated parts of China have fortunately not affected Omni's plants. The vinyl manufacturing plants are located hundreds of miles away. Additionally, travel ways between the plants and Chinese ports of exit are open to traffic. No delays are expected.

BURMA

Omni's latex and nitrile manufacturing plants are located in Malaysia and have not been affected by the recent cyclone that hit this region in the last few weeks.

GLOVE LINES will keep you apprised of any situation that would affect production of our glove products.

OIL PRICES UP AGAIN!

At press time, the price per barrel of crude oil exceeded \$129.00 US. This will obviously continue to affect the price of all petroleum based products including Vinyl and Nitrile gloves.

We are doing everything in our power to minimize future price increases. However, it looks as though more adjustments are inevitable.
