Omni Responds to Market Conditions

As most of you know, Omni International tries to always be proactive to you, our valued customers. You may have noticed we have tried to be the last to implement any price increases. Yet we are among the first to reduce pricing based on acquisition costs from our manufacturing partners.

We recently reduced our prices to all, not just a few select customers and will continue to monitor our manufacturers for any future price reductions.

Obviously petroleum prices continue to fluctuate and Omni will do what we always do, adjust your pricing as pricing is adjusted to us.

CONTAINERS FROM OMNI

Our regular container buyers know that Omni International covers liability insurance for you when you buy from us. In addition, Omni stands behind our products at all times making sure that you are covered should your container(s) be stopped for FDA random testing or other potential weather or logistical delays. No matter where you are, we stand by you at all times.

That's one of the major reasons Omni International's container business is so strong. If you are considering container purchases, make sure we have the opportunity to talk with you prior to ordering. We think you will be very pleasantly surprised.

OMNI Responds to the New AQL Levels

Most of you are aware that the FDA raised the bar for vinyl medical gloves by decreasing the acceptable AQL level from 4 to 2.5. We go further! Our Chinese manufacturing partner will only allow a 1.5 AQL for all products shipped to the United States.

We suspect some manufacturers cannot meet the 2.5 AQL. Should you need assistance, Omni has sufficient inventories, both here in our distribution centers, as well as on the water to keep your shelves full. Don't let gloves be an issue for you. Contact us at 888-999-6664 and one of our sales team will consult with you.

Did you know?

Omni International gloves are suitable for all kinds of professional uses. Our Vinyl, Nitrile and Latex gloves are very popular in acute care, long term and primary care. You can find our #212 Nitrile Gloves among many EMS/Fire and Police Agencies—including some major American cities.

Dentists really like the way our #113 Powder Free Latex feels while holding delicate instruments for surgical or cleaning applications.

Many people don't like being in prison. However, Omni is proud to say you can find our gloves there too.

All these fine customers are serviced by our dedicated and growing distribution network. Thanks for placing us on your customer's shelves.
