GLOVE LINES

 **OMNI INTERNATIONAL CORP**
A Blue Sail Company
Protecting People and Products™

We make Glove Sales Easy

At Omni International Corp., we carry just the right glove assortment. Long time customers know that we always provide the best possible value for the products we offer to our growing distribution base in all markets.

If you are a healthcare distributor, you know we carry basically five gloves today—1 latex, 2 nitrile and 2 vinyl glove products with their respective sizes.

If you are a food service or Jan San distributor, you know we carry various gloves for you, mostly vinyl - and focused for your sales efforts: Multi-Purpose, NSF Certified and AMS Anti-Microbial. It is a focused group of gloves that offer you the best value available.

Retail is a whole other world as there are so many private labels and virtually every one of them has their own nuances including sizes offered and box quantities.

However, Omni is not done when it comes to focusing our product lines for the best value available. We are working on new products with the

help of a few friends. Omni International has the benefit of the research & development departments of our exclusive manufacturing partners which includes Blue Sail who has always been in the forefront of PVC technology.

You will see as we grow our offerings, they will continue to be the **Best Value** in whichever product we bring to your market. You won't have to pick from various "latex" type offerings to figure out what is best for you. We will continue to do as always, provide that best value up front so you have a product you can sell with confidence, and assurance. Call your Omni Sales Representative or Michelle in customer service for samples—888-999-6664.

Glove Glossary

Chemotherapy Gloves

The FDA currently requires testing to publish the claim that any glove is appropriate for use with chemotherapy drugs. These are thicker (greater than 0.10 mm) latex and nitrile examination gloves. The OmniTrust™ #212 Powder Free Nitrile CF Gloves are certified safe for use with chemotherapy drugs. Call for a sample.
