New MP Gloves Hit the Shelves

For those of you who are familiar with Omni International Corp. and Blue Sail Corporation, you know we manufacture food service gloves for many of the high profile restaurant groups throughout the world. Up to now, these gloves have been sold to distributors exclusively via containers. Omni International is delighted to announce that these very same gloves are now available to our Food Service and Jan San distributors LTL via our distribution centers.

We have labeled these gloves our OmniShield™ Multi-Purpose (MP) Gloves. They are available powdered (331 series) and powder free (332 series). Our OmniShield™ MP Gloves are made of the highest quality PVC available. Of course, like all Omni / Blue Sail gloves, they are made with DINP which makes them DOP/DEHP Free.

The product is available now. We invite you to contact your OMNI Sales representative and request samples and information. Another new product from your friends at Omni International Corp.

Synthetic Stretch Sales Continue Their Growth

Medical distributors continue winning bigger pieces of business with our #412 series Synthetic Stretch vinyl Gloves.

As we have heard from the distribution community, our stretch vinyl is a great alternative for the user who wants to keep latex, but due to cost cutting at the facility, need to reduce costs.

The Omni Stretch Vinyl offers our unique Comfort Formulation which starts conforming to the hand as soon as it is donned.

You need to see this glove to really appreciate it. Contact your representative or customer service and have a sample of the OmniTrust Synthetic Stretch Vinyl (412 Series) glove sent to your office or home.

Glove Glossary

Thickness

The measurement of glove surface depth protecting skin from exposure to elements. Often given in mils. Conversion: 1mil = 0.001in. = 0.025mm.
