

Nitrile Powder Free Examination Glove

Our OmniTrust Nitrile™ Powder Free is a thermally activated glove that starts conforming to your hand when donned. You will find our Comfort Formulation very comfortable, reducing hand fatigue. It has our famous (micro-texture) fingertips for added grip control without loss of tactile sensitivity. Our 212 series is also tested safe use with Chemotherapy Drugs.

Features & Benefits

- Not Made With Natural Rubber Latex
- Textured Fingers for Tactile Sensitivity
- Ambidextrous Beaded Cuff, Single Use Only
- Comfortable Formulation, Thermally Activated
- Tested For Safe Use With Chemo Drugs
