

OmniShield 734/735

TPE Gloves

The Thermoplastic Elastomer Glove (TPE) is a cost saving product when compared to traditional vinyl food service gloves. They maintain more durable strength than CPE and Poly gloves, yet offer affordability when compared to vinyl. A TPE glove is a great product to use in assembling or distributing food on the line where little to no heat is used: assembly of sandwiches, serving and other food oriented applications. Used as an alternative to vinyl gloves, the TPE gloves provide a better hand conformity than CPE or Poly gloves in the workplace. Packed in several custom set-ups, we offer the below configuration from our Distribution Centers. Available in small, medium, large and extra-large sizes.

- Alternative to Vinyl Gloves
- Safe for Use With Food
- Nice, Soft Fit
- California Proposition 65 Compliant
- Powder Free & Smooth

Dimensions	Weight	Length
Small	1.9g ± 0.2g	270mm ± 5mm
Medium	2.0g ± 0.2g	270mm ± 5mm
Large	2.1g ± 0.2g	270mm ± 5mm
X-Large	2.2g ± 0.2g	270mm ± 5mm
