

CPE Gloves

The Cast Polyethylene Glove (CPE) is a unique poly style glove which is embossed for economical yet superior grip for all food service applications. A CPE glove is a great product to use in assembling or distributing food on the line where little to no heat is used as well as many other food service applications. Used as an alternative to vinyl gloves, the CPE gloves provide a better tactile sensitivity than other "smooth" gloves available on the market. Packed in several custom set-ups, we offer the below configuration from our Distribution Centers. Available in small, medium, large and extra-large sizes. All Omni International CPE Gloves are California Proposition 65 compliant.
