

Introducing: The OmniShield™ Thermoplastic Elastomer Glove

The Thermoplastic Elastomer Glove (TPE) is a cost saving product when compared to traditional vinyl food service gloves. They maintain more durable strength than the CPE and Poly gloves, yet offer affordability when compared to vinyl. A TPE glove is a great product to use in assembling or distributing food on the line where little to no heat is used. Assembly of sandwiches, serving and other food oriented applications is a primary use for these gloves. Used as an alternative to vinyl gloves, the TPE gloves provide a better hand conformity than CPE or Poly gloves in the workplace. Packed in several custom set-ups, we offer the below configuration from our Distribution Centers. Available in small, medium, large and extra-large sizes. All Omni International TPE Gloves are California Proposition 65 compliant.

Features/Benefits:

- Alternative to Vinyl Gloves
- Safe for Use With Food
- Nice, Soft Fit
- California Proposition 65 Compliant
- Powder Free, Smooth
- Color Options: Blue, Clear
