

OmniTrust Wound Care

Non-Woven Sponges Sterile & Non-Sterile

OmniTrust Non-Woven Sponges Sterile and Non-Sterile are made of a polyester and rayon fabric blend. Non-Woven sponges tend to have more strength, scrubbing texture and absorbency than traditional gauze sponges for superior wound management. In comparison, non-woven sponges are less adherent to wounds than traditional gauze sponges. Our Non-Woven Sponges are 4 ply and come in 3 sizes. For more absorbency around IV Sites and tracheotomy sites, OmniTrust Drain Sponges are 6 ply with a pre-cut slit that eliminates the use of scissors. Non-Sterile Non-Woven Sponges are packaged in bags of 200 each with either 10 or 20 bags per case based on size. Sterile Non-Woven Sponges are packaged 2 per package and varying quantity per case. See below for details. Sterile Drain Sponges are packaged 2 per sterile pack, 25 packs per box, 12 boxes per case.

Product	Omni Item #	Size	Ply	Pcs/Pouch Package	Pieces/Box	Boxes/Carton
