

CPE Isolation Gown

Introducing Omni's new CPE Isolation Gown. This product is part of Omni's new and expanding line of Personal Protective Equipment. The OmniTrust™ CPE Isolation Gowns meet the AAMI Level 2 protection standard for minimum or low barrier protection. These isolation gowns are made of thermoplastic chlorinated polyethylene elastomer (CPE) providing fluid resistance necessary in many applications and uses. The gowns are a great fit for most sizes, and the thumb loops add further comfort and security. Omni's CPE Isolation Gowns are non-sterile, single-use only items and are not intended to be used in a setting where high-level barrier protection is required.
